

Health & Safety

GENERAL POLICY STATEMENT

OXFORD BUSINESS COLLEGE

Oxford Business College recognises that it has responsibilities for the health and safety of our workforce whilst at work and others who could be affected by our work activities. We will assess the hazards and risks faced by our workforce in the course of their work and take action to control those risks to an acceptable, tolerable level. In accordance with Sections 2 and 3 of The Health and Safety at Work, etc., Act 1974, the College will ensure, so far as is reasonably practicable, the health, safety and welfare of all its staff, students, visitors and contractors where they have access to, or contact with, places where the business of the College is transacted.

Our managers and supervisors are made aware of their responsibilities and required to take all reasonable precautions to ensure the safety, health and welfare of our workforce and anyone else likely to be affected by the operation of our business. This business intends meeting its legal obligations by providing and maintaining a safe and healthy working environment so far as is reasonably practicable. This will be achieved by;

- providing leadership and adequate control of identified health and safety risks;
- consulting with our employees on matters affecting their health and safety;
- providing and maintaining safe plant and equipment;
- ensuring the safe handling and use of substances;
- providing information, instruction, training where necessary for our workforce, taking account of any who do not have English as a first language;
- ensuring that all workers are competent to do their work, and giving them appropriate training;
- preventing accidents and cases of work-related ill health;
- actively managing and supervising health and safety at work;
- having access to competent advice;
- aiming for continuous improvement in our health and safety performance and management through regular (at least annual) review and revision of this policy; and
- the provision of the resource required to make this policy and our health and safety arrangements effective.

We also recognise;

- our duty to co-operate and work with other employers when we work at premises or sites under their control to ensure the continued health and safety of all those at work; and
- our duty to co-operate and work with other employers and their workers, when their workers come onto our premises or sites to do work for us, to ensure the health and safety of everyone at work.

To help achieve our objectives and ensure our employees recognise their duties under health and safety legislation whilst at work, we will also remind them of their duty to take reasonable care for themselves and for others who might be affected by their activities. These duties are explained on first employment at induction and also set out in an Employee Safety Handbook, given to each employee, which sets out their duties and includes our specific health and safety rules.

In support of this policy a responsibility chart and more detailed arrangements have been prepared.

Safety Arrangement 1-1

We recognise the business benefits that can accrue from the effective management of safety and health at work. To obtain these benefits for our company we have recognised the need for an effective management system and have taken steps to put such a system in place.

We have done this by;

- Nominating an individual member of the senior management to take responsibility for managing safety and health at work.
- Providing adequate resources
- Providing such health and safety information, instruction and training for all workers as is necessary for them to be able to work without risk to their health or safety so far as is reasonably practicable.
- Recording and analysing all reportable accidents, minor accidents, near-miss incidents and dangerous occurrences.
- Reporting reportable accidents within the statutory timescales (information is in our Guidance Notes).
- Providing and recording relevant training.
- Routinely reviewing the operation of our reporting system.
- Having access to competent health and safety advice.

The person nominated with responsibility for overseeing this organisation's arrangements for managing safety and health at work is identified within the Responsibility Table of our Health and Safety Policy.

MANAGING SAFETY AND HEALTH AT WORK

Action Plan

In order to meet our legal obligations to manage safety and health at work we need to;

1. Identify a person to take responsibility for managing health and safety in our business activities.
2. Ensure that the responsible person understands their duties and responsibilities.
3. Provide adequate training for that person.
4. Give that person the authority required and the resource necessary for them to fulfil their role.
5. Plan our management of health and safety at work, set up and maintain systems that will deliver a satisfactory health and safety performance.
6. Explain to our workers, Supervisors and Managers the nature of our arrangements for managing health and safety at work.
7. Ensure that all our workers are aware of the need to make concerns about health and safety at work known and report accidents, incidents and cases of work-related ill health to their Managers.
8. Review our arrangements from time to time to ensure that they are fully understood and are operating correctly.

Advice and guidance on the reporting requirements and reporting system can be found in our Guidance Note 1-1 – Managing Safety and Health at Work.

ACCIDENT, INCIDENT, ILL-HEALTH REPORTING AND INVESTIGATION

We encourage our employees to report all personal injury accidents, near miss incidents (dangerous occurrences) and ill-health that happen in the course of their work so that we can investigate the causes, learn from experience and improve our management of health and safety. We also use the information to help us meet our obligations under the legislation requiring accidents to be reported to the Enforcing Authority.

We do this by;

- Nominating an individual member of staff to be responsible for investigating, recording and reporting accidents, incidents and cases of work related ill-health.
- Having accident, incident and work related ill-health reporting procedures.
- Recording and analysing all reportable accidents, minor accidents, near-miss incidents (dangerous occurrences) and work related ill-health.
- Reporting reportable accidents, dangerous occurrences and work related ill-health within the statutory timescales (information is in our Guidance Notes).
- Developing and implementing investigation protocols and policies.
- Providing and recording relevant training.
- Ensuring that those carrying out investigations are competent.
- Routinely reviewing the outcome of investigations and the operation of our reporting system.

The personnel responsible for reporting accidents, dangerous occurrences and work related ill-health are identified within the Responsibility Table of our Health and Safety Policy.

ACCIDENT, INCIDENT, ILL-HEALTH REPORTING AND INVESTIGATION

Action Plan

In order to meet our legal obligations to manage effectively the health and safety of our workforce and report accidents, incidents and cases of work related ill health to the Enforcing Authority we need to;

1. Identify people to be responsible for investigating the cause of injuries, incidents and ill-health and to manage our reporting arrangements.
2. Ensure that the people nominated with responsibility for these arrangements have the knowledge and experience to carry out investigations and operate the system effectively.
3. Provide suitable training for those who don't.
4. Create the systems and make sure all members of our workforce, including managers and supervisors are aware of and understand them.
5. Provide an accident book, implement the procedures, and ensure that they are followed in practice.
6. When investigating consider;
 - a. the time and date of the event, the prevailing weather conditions and local lighting.
 - b. what was happening or what the injured person and any witnesses were doing.
 - c. risk assessments or safe systems of work for the task being carried out and details of relevant training given to the injured party and others involved.
 - d. obtaining witness statements, where possible.
 - e. making a sketch of the accident area, include accurate measurements, if appropriate.
 - f. taking photographs of the site; record any unusual or causal features present.
 - g. making observational notes on the potential causation, noting features, equipment defects or work practice that may have contributed to the eventual outcome.
 - h. the underlying, as well as the immediate, causes of the event.
7. Keep a written record of investigations.
8. Review the causes of the events that have occurred to consider whether similar events could be prevented by the introduction of reasonably practicable control measures.
9. Monitor and review the operation of this procedure from time to time to check that the investigation and reporting procedures are understood, are being followed in practice and that lessons learned are being put into practice.

For information and advice see;

Guidance Note 1-3 – Accident, Incident and Ill-Health Reporting.

Guidance Note 1-4 – Accident Investigation.

WORKPLACE HEALTH AND SAFETY CONSULTATION

We have a duty to consult with our workforce on matters affecting their health, safety and welfare whilst at work. To meet this obligation we have established a process for Managers to consult with employees and elected safety representatives about work-related health, safety and welfare issues. We also use this system to deliver simple safety messages and rules through short tool-box talks.

We do this by:

- Nominating Supervisors and Managers to organise and hold consultation meetings and tool box talks.
- Recognising the role of elected and trade union safety representatives.
- Arranging scheduled formal consultation meetings or tool box talks between Managers, elected representatives and employees (see also Guidance Note – Workplace Health and Safety Consultation).
- Developing and implementing consultation procedures.
- Providing or allocating time for employees and elected safety representatives to undertake safety-related training.
- Taking and keeping minutes of consultation meetings, making them available to all staff.
- Being seen to listen and act on issues and concerns raised during consultation meetings.

We employ a unionised workforce. The Trade Union Safety Representative will hold regular meetings with the workforce to discuss health and safety issues. Their concerns will be brought into the consultation sessions by the Representative on behalf of the workforce.

The Management and Supervisory personnel responsible for implementing and operating this consultation process are identified within the Responsibility Table of our Health and Safety Policy.

WORKPLACE HEALTH AND SAFETY CONSULTATION

Action Plan

To set up a system for consulting with our workforce on health and safety at work matters we need to;

1. Ensure that the people nominated with responsibility for these arrangements have the knowledge and experience to operate the system effectively.
2. Provide suitable training for those who don't.
3. Create the system and make sure it is known to all members of our workforce.
4. Consider as part of the system;
 - a. recognising and involving representatives of the workforce from all levels.
 - b. recognising trade union safety representatives and those nominated by non-union workers.
 - c. where there are no nominated representatives, appointing a worker(s) to act as spokesman for the others.
 - d. permitting employee representatives to have time off to attend relevant health and safety training.
 - e. provide training for employee representatives if necessary or beneficial to the process.
 - f. scheduling health and safety as an agenda item for Consultation meetings.
 - g. Arranging to discuss safety concerns with Trade Union Safety Representatives.
 - h. formally recording the outcomes of all consultation meetings and retaining these records.
 - i. making the outcomes of consultation meetings available to all those employees affected by them.
5. Explain these arrangements to our workforce. Ensure they are understood.
6. Implement the procedure and ensure that it is followed in practice.
7. Monitor and review the operation of this procedure from time to time to check that our workforce is consulted about health and safety matters that affect them whilst at work.

Advice and guidance on consultation arrangements and procedures can be found in our Guidance Note 1-5 – Workplace Health and Safety Consultation.

RISK ASSESSMENT AND HAZARD REPORTING

We have a duty to assess the significant risks arising out of our business activities and for specific areas of concern. We have a duty to implement the findings of these risk assessments to ensure the safety, health and welfare of our employees and others who may be affected by our work activity.

To support this process and our management of health and safety we encourage our employees to report all hazards observed in the course of their work, so that potential risks can be identified and the appropriate action taken.

We do this by:

- Nominating senior staff members to oversee our risk assessment process and hazard reporting procedure.
- Ensuring that risk assessments are undertaken by competent, trained personnel.
- Developing risk assessments procedures, Safe Systems of Work and measures to effectively control the work activities within our work premises.
- Explaining the results of risk assessments to our workforce.
- Implementing the findings of the risk assessments, procedures, strategies, Safe Systems of Work and control measures.
- Implementing hazard reporting procedures and explaining them to our workforce.
- Recording and analysing hazards when they occur and investigating corrective and preventive measures.
- Employees and others following our procedures, control measures and Safe Systems of Work.
- Regular review of existing risk assessments and identifying the need for additional assessments.
- Providing and recording relevant training.
- Routinely reviewing the operation of our systems.

The personnel responsible for the above measures are identified within the Responsibility Table of our Health and Safety Policy.

We use the experience from operating these arrangements to make improvements to our safety, health and welfare management system.

RISK ASSESSMENT AND HAZARD REPORTING

Action Plan

For our risk assessment process to be sufficiently robust to protect the health, safety and welfare of our employees and those affected by our work activity we need to;

1. Nominate a senior manager to take responsibility for identifying hazards and managing and co-ordinating risk assessment.
2. Appoint and train sufficient numbers of staff in the process of risk assessment.
3. Systematically identify the hazards to which our workforce and others are exposed.
4. Provide a means for the workforce to identify and report hazards or potential hazards to their managers.
5. Consider the risks from those hazards, however recognised, identifying people at risk.
6. Evaluate the risks and decide if further precautions are required.
7. In significant cases, record our findings.
8. Implement those findings.
9. Involve Managers and workers in identifying hazards and carrying out risk assessments.
10. Explain the results of risk assessments to any affected staff and detail any new precautions or systems of work they need to follow.
11. Review risk assessments on a regular basis, commensurate to the risk.
12. Review our arrangements from time to time to ensure that they are fully understood and operating correctly.

For information and advice see;

Guidance Note 1-6 – Hazard Reporting.

Guidance Note 1-10 – Risk Assessment.

PURCHASING

We have a duty to ensure the safety, health and welfare of our employees and others who enter our premises and we have systems in place to protect these groups from any adverse effects of all plant, equipment, supplies and substances that we purchase to support our work activities.

Our systems consist of:

- Nominating senior staff members to identify and manage the organisation's safe purchasing requirements.
- Developing and implementing a purchasing policy, identifying the safest available options.
- Ensuring that this policy is implemented by trained and competent staff.
- Ensuring that the equipment purchased is safe, adequate and suitable for its purpose, and that safety devices and other control measures are fitted.
- Providing adequate and sufficient personal protective equipment to employees.
- Providing relevant training.
- Monitoring and reviewing our systems; using our experience of operating these arrangements we aim to make improvements to our purchasing policy.

The personnel responsible for the above measures are identified within the Responsibility Table of our Health and Safety Policy.

PURCHASING

Action Plan

To ensure that we purchase work equipment and substances that are safe, so far as is reasonably practicable, when used by our workers and others we need to;

1. Identify who in our company is authorised to purchase equipment, supplies and substances. Consider whether they need specific training for certain health and safety conditions.
2. Consider where we buy equipment and substances.
3. Obtain Manufacturer's Safety Data Sheets for the substances we purchase and consider the hazard and risk data provided.
4. When buying equipment specify in purchase orders that it complies with relevant European or National Standards.
5. On receipt of new equipment check that where relevant it bears compliance markings.
6. Involve workers in developing a procedure based on these considerations.
7. Explain these arrangements to our workforce. Ensure they are understood.
8. Provide training where required and information for staff nominated with responsibility.
9. Implement the procedure and ensure that it is followed in practice.
10. Monitor and review the operation of this procedure from time to time, making changes identified as necessary or beneficial.

Information and advice about health and safety on this subject can be found in our Guidance Note 1-9 – Purchasing.

NEW AND EXPECTANT MOTHERS

We have a duty to protect the health of new and expectant mothers from hazards that might be present in the workplace. We also have a duty to assess the risks to women of child bearing age from our activities and inform them of any potential risks that might affect a pregnancy.

We do this by:

- Nominating senior staff members to identify and assess the hazards which pose risk to new and expectant mothers.
- Developing and implementing systems and procedures that will protect all women of child bearing age from risks to unborn children.
- Developing and implementing systems and procedures that will protect new and expectant mothers and their children from hazards and risks in our workplace or risks from the work activity.
- Considering the personal needs of each new and expectant mother.
- Ensuring that the assessments are sensitively carried out by competent, trained personnel.
- Implementing the findings of each assessment.
- New and expectant mothers and other workers following agreed procedures and control measures.
- Recording our assessments and agreed plans.
- Monitoring and reviewing our systems; using our experience of operating these arrangements we aim to make improvements to the way we manage potential risks to new and expectant mothers.

The personnel responsible for the above measures are identified within the Responsibility Table of our Health and Safety Policy.

NEW AND EXPECTANT MOTHERS

Action Check List

To protect the health of new and expectant mothers and women of child bearing age we should;

1. Assess the risks that our business activities may have on women of child bearing age and any potential foetus.
2. Inform the workforce of those risks.
3. Reduce those risks so far as is reasonably practicable.
4. Assess the risks to any worker who notifies us that they are pregnant or are returning to work after having given birth.
5. Consider factors such as;
 - a. Substances to which they might be exposed.
 - b. The size and shape of their workstation.
 - c. Posture.
 - d. Vibrations.
 - e. Environmental factors.
 - f. Ability to stand or sit for long periods.
 - g. Night working.
 - h. Lifting and carrying.
 - i. Noise levels.
 - j. Welfare arrangements.
6. Discuss the results of the risk assessment with the worker.
7. Consider how to reduce risks.
8. Find alternative work for the worker if it is not possible to reduce risks in her current job to an acceptable level. Alternatively give her paid absence from work.
9. Implement our decisions.
10. Make sure Supervisors and other employees are aware and understand the measures to be taken.
11. Review the risk assessment as pregnancy develops or as the pregnant worker makes any concerns or problems known.

Advice and guidance on managing the health and safety of new and expectant mothers can be found in Guidance Note 1-11.

EMPLOYING CHILDREN AND YOUNG PERSONS

When we employ children and young persons or give them work experience we have particular duties to protect their safety, health and welfare whilst at work.

We do this by:

- Nominating senior staff members to be responsible for the young people and to identify the hazards which pose risk to young persons.
- Developing and implementing young person risk assessments, procedures, Safe Systems of Work and control measures.
- Ensuring that any young person assessments are particularly thorough and undertaken by competent, trained personnel.
- Explaining these assessments to the young people and their Supervisors.
- Ensuring that young persons are closely managed and supervised.
- Regularly inspecting the premises to identify any new processes, personnel or changes to the building's structure which would trigger the need for re-assessment.
- Employees and others adhering to the contents of procedures, control measures and Safe Systems of Work.
- Providing and recording relevant training.
- Monitoring and reviewing our systems; using our experience of operating these arrangements we aim to make improvements to the way we manage the risks to young people whilst they are working for us.

The personnel responsible for the above measures are identified within the Responsibility Table of our Health and Safety Policy.

EMPLOYING CHILDREN AND YOUNG PERSONS

Action Plan

To protect children and young people who work for us or with us on work experience schemes we need to;

1. Appoint a Manager to oversee the employment of children and young persons.
2. Assess the risks to children and young persons from our activities and the work we give them to do.
3. Consider;
 - a. The jobs they do.
 - b. The substances that they might come into contact with.
 - c. Machinery and equipment they might be asked to use.
 - d. Their lack of experience.
 - e. Their lack of appreciation of industrial risks.
 - f. Their attention span.
 - g. Their immaturity.
 - h. Exposure to toxic, carcinogenic, mutagenic and tetragenic substances.
 - i. Physical and environmental hazards.
 - j. Close supervision is required.
 - k. Are their hours of work within the legal limits?
 - l. Is health surveillance required? If yes at what level?
4. Develop arrangements and procedures based on these considerations – involve the workforce.
5. Explain these arrangements and procedures to the young workers and their parents.
6. Explain the arrangements to our workforce. Ensure they are understood, especially by those who will be working alongside the young workers and provide further training where necessary.
7. Keep a written record of the risk assessment, the control measures and systems of work adopted. Record details of training given.
8. Make sure that Managers and Supervisors understand the procedures and arrangements. Consider whether they need any training.
9. Implement the arrangements and procedures and ensure they are followed in practice.
10. Monitor and review the operation of this procedure from time to time and after any incident causing injury or with the potential to cause injury to a young worker.
11. Make any changes to our procedures and arrangements identified as necessary.

Guidance on the employment of children and young workers, including a template for young worker risk assessments, can be found in Guidance Note 1-12.

HEALTH AND SAFETY TRAINING

We have a duty to protect the health, safety and welfare of our employees whilst they are at work and others who might be affected by our work activities. Among other specific arrangements we need to be sure that our workforce is trained to recognise hazards and risks and what they need to do to eliminate, reduce and avoid risk.

We do this by:

- Nominating senior staff members to manage Health and Safety training.
- Making an assessment of the risks to our workforce and others from an inadequately trained workforce.
- Developing and implementing training policies, programmes and arrangements.
- Ensuring that the management of the policy, programmes and arrangements are undertaken by competent, trained personnel.
- Managing our activities to ensure that employees are adequately trained for the variety of tasks which they may be required to do.
- Providing and recording relevant training.
- Monitoring and reviewing our systems; using our experience of operating these arrangements we aim to make improvements to the way we manage our Health and Safety training programmes.

The personnel responsible for above measures are identified within the Responsibility Table of our Health and Safety Policy.

HEALTH AND SAFETY TRAINING

Action Check List

In developing and implementing training policies, programmes and arrangements we need to:

1. Assess our work activity to identify where and when workers or the public may be exposed to hazards and risks.
2. Where we identify hazards we need to consider the associated risks and the ability of staff to control them and then to identify whether their knowledge of and training about control measures is adequate.
3. Identify any jobs that require workers to have received specific health and safety training.
4. Identify the systems already in place to provide training and any additional measures that may be required.
5. Consider procedures and practices including ;
 - a. Plant and machinery.
 - b. Chemical and chemical processes.
 - c. Works transport.
 - d. Working at height.
 - e. Lifting machines and equipment.
 - f. Electrical safety.
 - g. Mundane work.
 - h. Occasional work activities.
 - i. Training needs analyses for individuals.
6. Involve the workforce in making these assessments of our needs.
7. Develop procedures, programmes and practices tailored to our workplace.
8. Explain these arrangements to the workforce, their Supervisors and Managers. Ensure they are understood and provide further training where necessary.
9. Implement the procedures and ensure that they are followed in practice.
10. Monitor and review the operation of the procedures from time to time making changes identified as necessary or beneficial.

Advice and guidance on the control of Health and Safety Training can be found in Guidance Note 1-14.

HEALTH AND SAFETY OF VISITORS

We have a duty to ensure the health and safety of members of the public who come into our workplace.

We do this by:

- Nominating senior staff members to identify and risk assess the workplace hazards which pose risk to visitors.
- Making an assessment of the risks to visitors.
- Providing a visitors' book to track visitors present in our premises.
- Developing visitor procedures and control measures.
- Implementing visitor procedures and control measures.
- Ensuring that risk assessments are undertaken by competent, trained personnel.
- Regularly inspecting the premises to identify any new processes, personnel or changes to the building's structure that could pose new risk to visitors.
- Ensuring employees and others adhere to the contents of procedures, control measures and Safe Systems of Work.
- Providing relevant information and training.
- Monitoring and reviewing our systems; using our experience of operating these arrangements we aim to make improvements to the way we manage the risks to visitors.

HEALTH AND SAFETY OF VISITORS

Action Plan

To protect visitors to our workplace we need to:

1. Assess our work activity to identify where and when the public may be exposed to hazard and risk.
2. Identify risks that visitors might face when at our workplace.
3. Where risks to the health and safety of visitors is identified or reported, assess those risks to identify where control measures are required.
4. Identify any control measures already in place and any additional measures that may be required.
5. Consider among other issues;
 - a. Where visitors go, when they go there, why they go there and what they do when they get there.
 - b. Floor coverings
 - c. Slippery floors
 - d. Chemical hazards
 - e. Electrical hazards
 - f. Condition of stairs etc
 - g. Machinery hazards.
 - h. Workplace transport.
6. Involve the workforce in making these assessments; use their experience.
7. Develop procedures, programmes and practices for ensuring visitor safety that are tailored to our workplace.
8. Explain these arrangements to the workforce, their Supervisors and Managers. Ensure they are understood and provide further training where necessary.
9. Implement the procedure and ensure that it is followed in practice.
10. Monitor and review the operation of this procedure from time to time and whenever a visitor suffers a work related injury, making changes to the procedure identified as necessary or beneficial.

Further advice and guidance on the Health and Safety of visitors can be found in Guidance Note 1-15.

SAFE SYSTEMS OF WORK

We have a duty to ensure our workforce are provided with clear instructions and training when undertaking potentially hazardous tasks that pose significant risks.

We do this by:

- Nominating senior staff members to oversee and implement Safe Systems of Work.
- Identifying where Safe Systems of Work are required.
- Developing Safe Systems of Work to effectively control the work activities within our work premises.
- Communicating the Safe Systems of Work to applicable employees.
- Ensuring that Safe Systems of Work are created by competent, trained personnel.
- Providing training on the Safe System to the workforce.
- Regular checks to ensure that the Systems are being followed.
- Reviewing our systems.

The personnel responsible for the above measures are identified within the Responsibility Table of our Health and Safety Policy.

We use the experience from operating these arrangements to make improvements to our safety, health and welfare management system.

SAFE SYSTEMS OF WORK

Action Plan

To ensure that adequate Safe Systems of Work are in place for employees to follow we need to;

1. Appoint and train sufficient numbers of staff in the creation of the Safe System of Work.
2. Systematically identify the areas where a Safe System of Work may be required.
3. Assess the task and identify the hazards.
4. Define the safe method of undertaking the task.
5. Document the Safe System of Work and ideally display it at the work site where the work takes place.
6. Implement the System and ensure employees understand it. Provide training where necessary.
7. When developing and implementing Safe Systems of Work we should involve Managers and workers in the task being assessed.
8. Review Safe Systems of Work on a regular basis or when situations change.

Advice and guidance on Safe Systems of Work can be found in our Guidance Note 1-20 – Safe Systems of Work.

ACTION ON ENFORCEMENT AUTHORITY REPORTS

We recognise the benefits that will accrue from early action following receipt of reports from the Enforcement Authority in regard to health safety and welfare issues. To obtain these benefits we have recognised the need for an effective management system and have taken steps to be able to action such reports.

We have done this by;

- Nominating an individual member of the senior management who will coordinate actions required to meet the requirements of Enforcement Authorities.
- Providing adequate resources either financial or human to be able to meet the requirements of the Enforcing Authority.
- Routinely reviewing the operation of our reporting system.
- Having access to competent health and safety advice.

The person nominated with responsibility for overseeing this organisation's arrangements for compliance with Enforcing Authority requirements is identified within the Responsibility Table of our Health and Safety Policy.

ACTION ON ENFORCEMENT AUTHORITY REPORTS

Action Plan

In order to meet our legal obligations to provide adequate health and safety information to employees we need to;

1. Identify a person who will coordinate actions required to meet the requirements of Enforcement Authorities.
2. Ensure that the responsible person understands their duties and responsibilities.
3. Provide adequate training for that person.
4. Give that person the authority required and the resource necessary for them to fulfil their role.
5. Ensure that our workers are aware of the need to make concerns about health and safety known and report accidents, incidents and cases of work-related ill health to their Managers.
6. Review our arrangements from time to time to ensure that they are fully understood and are operating correctly.

Advice and guidance on this subject can be found in our Guidance Note 1-21 Action On Enforcement Authority Reports.

EQUALITY, DISABILITY DISCRIMINATION AND COMPLIANCE

We recognise the benefits that will accrue from planned and carefully considered arrangements in regard to the equal treatment of all people and health, safety and welfare issues. To obtain these benefits we have recognised the need for an effective management system and have taken steps to be able to successfully manage disability in the workplace.

We have done this by;

- Nominating an individual member of the senior management who will coordinate actions required to meet the requirements of disadvantaged and vulnerable persons
- Providing adequate resources either financial or human to be able to reasonable adjustments to our workplace(s)
- Allowing employees to nominate safety representatives who will coordinate issues arising from their colleagues in respect of health, safety and welfare.
- Providing adequate resources
- Providing such health and safety information, instruction, and training for all workers as is necessary for them to be able to work without risk to their health or safety or welfare so far as is reasonably practicable.
- Recording and analysing all reportable accidents, minor accidents, near miss incidents and dangerous occurrences.
- Providing and recording relevant training
- Routinely reviewing the operation of our reporting system.
- Having access to competent health and safety advice.

The person nominated with responsibility for overseeing this organisation's arrangements for compliance with statutory requirements in this respect is identified within the Responsibility Table of our Health and Safety Policy.

EQUALITY, DISABILITY DISCRIMINATION AND COMPLIANCE

Action Plan

In order to meet our legal obligations to avoid disability discrimination to employees we need to;

1. Identify a person who will coordinate actions required to meet the requirements of legislation that requires us to treat all people equally.
2. Ensure that the responsible person understands their duties and responsibilities.
3. Provide adequate training for that person.
4. Give that person the authority required and the resource necessary for them to fulfil their role.
5. Review our arrangements from time to time to ensure that they are fully understood and are operating correctly.

Advice and guidance on this subject can be found in our Guidance Note 1–22, Equality, Disability Discrimination and Compliance

HEALTH AND SAFETY INFORMATION FOR EMPLOYEES

We recognise the benefits that will accrue from the provision of effective information regarding health safety and welfare activities to our employees. To obtain these benefits we have recognised the need for an effective management system and have taken steps to provide adequate information to employees and others.

We have done this by;

- Allowing employees to nominate safety representatives who will coordinate issues arising from their colleagues in respect of health, safety and welfare.
- Providing adequate resources
- Providing such health and safety information, instruction, and training for all workers as is necessary for them to be able to work without risk to their health or safety or welfare so far as is reasonably practicable.
- Recording and analysing all reportable accidents, minor accidents, near miss incidents and dangerous occurrences.
- Providing and recording relevant training
- Routinely reviewing the operation of our reporting system.
- Having access to competent health and safety advice.

The person nominated with responsibility for overseeing this organisation's arrangements for provision of information to employees is identified within the Responsibility Table of our Health and Safety Policy.

HEALTH AND SAFETY INFORMATION FOR EMPLOYEES

Action Plan

In order to meet our legal obligations to provide adequate health and safety information to employees we need to;

1. Identify a person to take responsibility for ensuring that adequate information is provided to employees.
2. Ensure that the responsible person understands their duties and responsibilities.
3. Provide adequate training for that person.
4. Give that person the authority required and the resource necessary for them to fulfil their role.
5. Identify the most effective methods by which information will be circulated to the employees.
6. Display the required health and safety 'What you should know' poster and complete the information on the poster.
7. Provide information to our employees in regard to their responsibilities and essential safety rules.
8. Explain to our workers, supervisors and managers the nature of our arrangements for managing health, safety and welfare.
9. Ensure that our workers are aware of the need to make concerns about health and safety known and report accidents, incidents and cases of work-related ill health to their Managers.
10. Review our arrangements from time to time to ensure that they are fully understood and are operating correctly.

Advice and guidance on this subject can be found in our Guidance Note 1-23 Health and Safety Information for Employees.

FIRE SAFETY – ARRANGEMENTS AND PROCEDURES

We have a legal duty to implement and maintain a fire safety programme to ensure employees have a full understanding of the evacuation procedures for the premises where they are working. We have put in place arrangements to meet these responsibilities and to identify and reduce the risks associated with fire and emergency situations.

Our arrangements consist of:

- Nominating a ‘responsible person’ to coordinate fire and emergency arrangements and take responsibility to ensure employees undertake induction training when working on client sites, part of which will be emergency evacuation.
- Identifying fire risks and potential emergency situations and who may be affected.
- Assessing the level of risk and recording the information in Risk Assessments.
- Implementing procedures and control measures to mitigate the risks posed.
- Developing Safe Systems of Work to reduce the potential incidence of fire and emergency situations.
- Adequate provision of tested and inspected fire fighting equipment in our vans.
- Delivering training on the Risk Assessment and on the use of any fire fighting equipment provided.
- Reviewing our system.

The personnel responsible for fire and emergency arrangements are identified within the Responsibility Table of our Health and Safety Policy.

We use the experience of operating these systems to make improvements to our safety, health and welfare management system.

FIRE SAFETY - ARRANGEMENTS AND PROCEDURES

Action Plan

To protect workers and others from the risk of fire we need to develop a comprehensive fire safety programme. We need to;

1. Nominate and train a person to be our competent and Responsible Person for fire safety matters.
2. Seek confirmation that there is an up to date fire risk assessment in respect of our clients' premises and processes.
3. Seek confirmation that sufficient and suitable fire alarm systems, means of escape, fire fighting equipment, emergency lighting and emergency signs are provided.
4. Make sure that clients explain to our workers the emergency procedures for safe and speedy evacuation to a place of relative safety in the event of a fire or other emergency.
5. Consider;
 - a. Fire prevention. Storage of flammables, waste disposal, open flames etc.
 - b. Potential sources of ignition including use of flammable substances and process related fire hazards.
 - c. Maintenance of fire alarms, smoke detectors, automatic door closers.
 - d. Maintenance of fire doors and escape routes.
 - e. Emergency procedures – fire wardens, fire and evacuation drills and safe assembly points.
 - f. Maintenance of fire extinguishers and fire fighting equipment.
 - g. Liaison with fire service and assisting the fire service in the event of a fire.
 - h. Providing and maintaining fire safety signs and notices.
 - i. Record keeping.
 - j. Safe means of shutting down electric, gas and fuel supplies.
6. Explain these Arrangements and Procedures to our Managers, Supervisors, workforce. Ensure they are understood.
7. Provide training where required and information for staff nominated with responsibilities.
8. Implement the Programme and ensure that it is followed in practice.
9. Monitor and review the operation of all aspects of the Fire Safety Programme at least twice a year and whenever a fire related incident happens, making changes to the fire risk assessment, arrangements and procedures identified as necessary or beneficial.

Advice and guidance on the development of a Fire Safety Programme can be found in the fire safety section of the health and safety management system.

FIRST AID

We have a duty to provide suitable first aid arrangements for our staff whilst at work and visitors who may be affected by our activities. We have taken steps to provide first aid arrangements that meet this requirement.

We do this by:

- Nominating a Senior Manager to identify our needs and ensure continuing arrangements for first aid provision.
- Assessing the reasonable level of first aid provision required for our business at our workplace and for travelling staff.
- Recruiting sufficient members of staff to undertake first aid training as a first aider or appointed person, as appropriate.
- Arranging approved training for those people and keeping records of their training.
- Providing adequate numbers of trained personnel to be available at all times during business hours.
- Providing and maintaining sufficient quantities of first aid equipment and consumables.
- Displaying names and locations of first aid trained personnel or appointed persons in prominent positions throughout the premises.
- Routinely reviewing our first aid arrangements for suitability and ensuring that where we have trained first aiders qualifications are up to date.

FIRST AID

Action Plan

To ensure that we meet our obligations to provide suitable first aid arrangements for our staff whilst at work and visitors who may be affected by our activities we need to take the following action;

1. Assess our business activity to identify the level of first aid provision that will be necessary.
2. Consider issues including;
 - a. The likely severity of foreseeable work-related accidents.
 - b. The number of people likely to be in the workplace.
 - c. The nature of health and safety risks at the workplace.
 - d. The location and accessibility of the workplace.
 - e. Whether the need is for trained first aiders or appointed persons.
3. Keep a written record of our assessment and conclusions.
4. Explain our assessment and conclusions to our workforce.
5. Identify workers to be trained and take responsibility for administering first aid.
6. Provide approved training for appointed first aiders.
7. Keep records of this training and ensure qualifications are kept up to date.
8. Make sure our arrangements are understood and the responsible people known to all workers, Supervisors and Managers.
9. Provide suitable facilities and consumables for delivering first aid at our workplace.
10. Monitor and review from time to time the operation of this procedure in the light of experience making changes to our system identified as necessary or beneficial.

Information and advice on First Aid provision can be found in our Guidance Note 3-1 – First Aid.

WELFARE, STAFF AMENITIES, REST ROOMS and the WORKING ENVIRONMENT

We are obliged to make and maintain arrangements for welfare and the provision of a safe and healthy working environment for our workforce whilst they are at work. This includes a duty to provide restrooms where work is arduous or conducted in a hostile environment and for the welfare of new and expectant mothers.

We do this by;

- Nominating senior staff members to oversee our provision and maintenance of welfare facilities and a safe working environment.
- Maintaining our workplace including buildings and fixtures in good order and according to required standards.
- Providing welfare facilities that are fit for purpose and include adequate hot, cold and drinking water, sanitary conveniences, hand washing facilities, facilities for meal breaks, sufficient light, heat and ventilation.
- Implementing housekeeping, cleaning and maintenance regimes.
- Providing and recording relevant instruction and training.
- Regular monitoring and review of our arrangements and facilities to ensure that they remain sufficient and are adequately maintained.

The personnel responsible for these measures are identified within the Responsibility Table of our Health and Safety Policy.

WELFARE, STAFF AMENITIES, REST ROOMS and the WORKING ENVIRONMENT

Action Plan

To ensure that we make the proper and necessary arrangements for welfare and to provide a safe working environment for our workforce we need to;

1. Consider the arrangements we have in place to provide for the welfare of our workforce whilst at work and to provide a safe working environment.
2. Assess the specific welfare arrangements, including rest rooms and catering areas that we have provided against both minimum legal requirements and what might reasonably be expected by law; particularly where work may be arduous or in a hostile environment.
3. Consider among other relevant issues;
 - a. our worksite, the condition of the buildings;
 - b. temperature, ventilation and lighting in the workplace;
 - c. the use of chemical, biological and radiological substances;
 - d. the condition of floors, walls and ceilings;
 - e. traffic routes;
 - f. sanitary and washing facilities;
 - g. clothing accommodation, changing rooms and rest rooms;
 - h. drinking water and the means for making hot drinks and heating food;
 - i. workers in isolated locations;
 - j. the needs of nursing and expectant mothers;
 - k. the heating and cleaning of rest rooms and welfare facilities.
4. Involve workers in these considerations and in the development and maintenance of facilities and arrangements based on these considerations.
5. Keep a written record of significant assessments, actions identified and taken.
6. Provide information and any necessary training to employees, Managers and any staff nominated with responsibility to ensure that our arrangements and provisions are understood.
7. Monitor welfare arrangements and facilities to ensure that they remain sufficient, are maintained in a good clean condition and are fit for purpose.

For information and advice, please see;

Guidance Note 3-2, Welfare and the Working Environment.

Guidance Note 3-8, Staff Amenities and Rest Rooms.

Guidance Note 1-11, New and Expectant Mothers.

HOUSEKEEPING and CLEANING

We have a duty to ensure the safety, health and welfare of our employees and others who enter our premises by keeping it in a clean, tidy and sanitary condition.

We do this by:

- Nominating senior staff members to oversee the provision and management of housekeeping facilities and arrangements. Where necessary, making a risk assessment of the risks posed to our workforce and others from housekeeping activities.
- Developing and implementing cleaning procedures and associated safe systems of work where required.
- Ensuring that competent, trained personnel undertake the management of the policy, cleaning regimes and control measures.
- Carrying out regular housekeeping audits.
- Providing and using personal protective equipment where necessary.
- Managing our activities to ensure that employees and others use the control measures provided and follow our policies and procedures.
- Providing instruction and where necessary training which is recorded.
- Regular monitoring and review of our arrangements; to ensure that the workplace is kept clean and that our cleaning arrangements are adequate.
- Employees and others adhering to the contents of the procedures and safe systems of work.

The personnel responsible for the above measures are identified within the Responsibility Table of our Health and Safety Policy.

HOUSEKEEPING and CLEANING

Action Check List

To ensure that we keep our workplace tidy and in a clean, sanitary condition we need to;

1. Assess all areas of the workplace and work activities to determine the cleaning requirements for each area.
2. Devise and implement cleaning plans and schedules for each area; specifying and recording them.
3. In devising these plans consider issues including;
 - a. Floors, stairs, toilets, rest and catering areas, outside paths, roadways and storage areas, etc.
 - b. The contaminant and the most appropriate method for cleaning; vacuum cleaning is better than sweeping
 - c. Dry cleaning or wet cleaning. Wet cleaning may leave slippery floors.
 - d. The source of the contaminant - can it be contained other than by cleaning?
 - e. The frequency of and best time of day for cleaning.
 - f. Waste handling and disposal – offensive, unhygienic, infected, chemical, process etc.
 - g. Warning signs.
 - h. Hazards associated with chemical cleaners.
 - i. Cleaning around potentially hazardous equipment.
 - j. Procedures for cleaning hazardous equipment.
4. Involve the workforce in making these assessments of our needs.
5. Explain these arrangements to the cleaning team, the workforce, their Supervisors and Managers. Ensure they are understood. Provide and record training where necessary.
6. Resource and implement the procedures ensuring that they are followed in practice.
7. Make sure Managers understand the requirements.
8. Monitor the implementation and continuing effectiveness of our procedures to ensure that our workplace is being cleaned properly and adequately.
9. Amend our systems and procedures as necessary in the light of operational experience.

Advice and information on Housekeeping can be found in Guidance Note 3-12.

BUILDING SERVICES

We have a duty to protect our employees and others from the risks of injury if adequate controls are not in place and maintained for basic building services such as gas, electricity, oil, telephones, clean and waste water.

We do this by:

- Nominating senior staff members to reduce the risks posed by the services.
- Making an assessment of the risks from the services to our workforce and others.
- Developing and implementing sufficient control measures to identify all of the major services in the workplace e.g. gas, electricity, water etc
- Ensuring that the management of the control measures relating to services are undertaken by competent, trained personnel.
- Managing our activities to ensure that employees and others use the control measures provided and follow our policies, procedures and Safe Systems of Work.
- Providing and recording relevant training.
- Monitoring and reviewing our systems; using our experience of operating these arrangements we aim to make improvements to the way we manage the risks from building services.

The personnel responsible for above measures are identified within the Responsibility Table of our Health and Safety Policy.

BUILDING SERVICES

Action Check List

To protect workers from risks posed from building services we should have:

1. Identified where and when workers or the public may be exposed to the risks from building services.
2. Identified the control measures already in place and any additional measures that may be required.
3. Considered issues including;
 - a. The identification of all major services.
 - b. A suitable and sufficient safe system of isolation.
 - c. The presentation of this information (a simple plan located alongside any emergency alarm evacuation control zone panel etc.).
 - d. Ensuring the emergency services can be made aware of this information.
 - e. Is all gas work carried out by a competent person, with membership of an approved trade association?
 - i. In Great Britain this is the Gas Safe™ Register.
 - ii. In the Republic of Ireland this is the Register of Gas Installers of Ireland (RGII) scheme.
 - iii. Elsewhere gas engineers should be registered with GasSafe™.
 - f. Is all electrical work carried out by a competent person, with membership of a recognised electrical trade association?
4. Made sure that Managers and Supervisors understand the procedures and arrangements. Considered whether they need any training.
5. Explained our system and arrangements to the workforce. Ensured they are understood and provide further training where necessary.
6. Implemented the procedure and ensure that it is followed in practice.
7. Monitored and reviewed the operation of this procedure from time to time and made changes to the procedure identified as necessary or beneficial.

Information and advice on the control of building services can be found in our Guidance Note 3-5 - Building Services.

PREMISES

We have a duty to protect our employees and others from the hazards and risks posed by entering our premises and to ensure that our facilities are provided and maintained to an acceptable standard.

We do this by:

- Nominating senior staff members to reduce the risks posed by work in or by use of our facilities.
- Making an assessment of the risks arising from working on our premises to our workforce and others.
- Developing and implementing control measures, policies and Safe Systems of Work.
- Ensuring that the management of the policy, procedures, Safe Systems of Work and control measures relating to our premises are undertaken by competent, trained personnel.
- Managing our activities to ensure that employees and others use the control measures provided and follow our policies, procedures and Safe Systems of Work.
- Providing and recording relevant training.
- Monitoring and reviewing our systems; using our experience of operating these arrangements we aim to make improvements to the way we manage the risks posed.

The personnel responsible for the above measures are identified within the Responsibility Table of our Health and Safety Policy.

PREMISES

Action Check List

To protect workers and others from the risks associated with our premises we should have;

1. Completed out a general risk assessment of the facility identifying any hazards that the premises may pose to our employees.
2. Considered;
 - a. Work space – ensuring employees can carry out their tasks without obstruction.
 - b. Sanitary conveniences and washing facilities – must be available within close proximity to the workforce and determined by the number of employees.
 - c. Windows and doors – ensuring these do not pose an obstruction or vision problem.
 - d. Rest areas - provision for employees to be able to eat and drink away from working areas.
3. Provided clean sanitary facilities, a supply of drinking water and rest areas for staff appropriate to the numbers of employees in our workplaces.
4. Ensured that a fire risk assessment has been made and recorded,
5. Arranged for routine testing of the fire alarm system and emergency lighting; ensuring that this is documented.
6. Identified any asbestos present in the premises and maintain an asbestos register; seeking remediation treatment where necessary.
7. Ensured all our insurance liability policies are current and suitable for the premises.
8. Ensured glazing in high risk areas is of a safety material or protected against breakage.
9. Considered pedestrian segregation from vehicles, with clearly identified walkways as a means of ensuring pedestrian safety.
10. Implemented a suitable housekeeping regime that reduces the likelihood of slip, trip and fall hazards occurring on our premises.

Advice and guidance on the control of hazards in our premises can be found in Guidance Note 3-15.

ELECTRICAL SAFETY

We have a duty to protect our employees and other people who use our premises from the risk of electrical injury caused by our electrical installations, our use of fixed equipment and our use of portable electrical appliances.

We do this by:

- Nominating senior staff members to ensure the safety of our electrical installation equipment and portable appliances.
- Making an assessment of the risks from electrical installations, fixed equipment and portable appliances.
- Developing and implementing procedures, control measures, policies and Safe Systems of Work.
- Ensuring that any work carried out on our electrical installation, equipment and appliances is carried out by competent, accredited electrical engineers.
- Providing and using personal protective equipment where appropriate.
- Regular inspection by competent accredited electrical engineers.
- Managing our activities to ensure that employees and others use the control measures provided and follow our policies, procedures and Safe Systems of Work.
- Providing relevant training and keeping training records.
- Monitoring and reviewing our systems; using our experience of operating these arrangements we aim to make improvements to the way we manage electrical safety.

The personnel responsible for the above measures are identified within the Responsibility Table of our Health and Safety Policy.

ELECTRICAL SAFETY

Action Check List

To protect workers and others from the risks from using fixed and portable electrical equipment we need to:

1. Consider our activities and identify where and when workers may be exposed to risks to their health and safety from fixed or portable electrical equipment.
2. Assess the risks from that exposure to fixed and portable electrical equipment, identifying control measures in place and any additional measure that may be required to avoid risk.
3. Consider relevant issues including:
 - a. The competence of employees or contractors who install or maintain electrical equipment.
 - b. Inspection of fixed electrical installations as prescribed by the IEE Wiring Regulations (17th edition) BS 7671.
 - c. The maintenance of electrical installations between inspections.
 - d. The maintenance and inspection of portable electrical equipment.
 - e. Using battery powered hand tools.
 - f. Whether hydraulic or pneumatic tools might be safer.
 - g. Reducing the operating voltage.
 - h. Residual current devices.
 - i. Use in flammable or explosive areas; use in wet and adverse conditions.
 - j. Equipment used by mobile workers.
 - k. Use of trailing cables.
4. Purchase robust equipment suitable for the environment in which it is to be used.
5. Arrange for the routine testing and inspection of portable electrical equipment.
6. Develop a procedure based on these considerations.
7. Keep a written record of significant risk assessments and the control measures and systems of work adopted.
8. Make sure that Managers and Supervisors understand the procedures and arrangements. Consider whether they need any training.
9. Explain our procedures and arrangements to our workforce. Ensure they are understood and provide training where necessary.
10. Implement the procedure and ensure that it is followed in practice.
11. Monitor and review the operation of this procedure from time to time and after any electrical incident, making changes identified as beneficial or necessary.

Information and advice on the use of fixed and portable electrical equipment can be found in our Guidance Note 4-1 – Electrical Safety.

OFFICE EQUIPMENT

We have a duty to protect our employees and other people who use our premises from the risks associated with the use of office equipment.

We do this by:

- Nominating senior staff members to consider the safety implications of our use of office equipment.
- Making an assessment of the risks from our use of office equipment.
- Developing and implementing procedures, control measures, policies and Safe Systems of Work.
- Ensuring that office equipment is properly maintained.
- Managing our activities to ensure that employees and others use the control measures provided and follow our policies, procedures and Safe Systems of Work.
- Providing relevant training and keeping training records.
- Monitoring and reviewing our systems; using our experience of operating these arrangements we aim to make improvements to the way we manage the safety of office equipment.

The personnel responsible for the above measures are identified within the Responsibility Table of our Health and Safety Policy.

OFFICE EQUIPMENT

Action Check List

To protect workers and others from the risks of using office equipment we need to:

1. Consider our activities and identify where and when workers may be exposed to risks to their health and safety from the use of office equipment.
2. Assess the risks from that use of office equipment, identifying control measures already in place and any additional measure that may be required to avoid risk.
3. Consider relevant issues including:
 - a. The competence and training of workers who use office equipment.
 - b. Who does what when the equipment goes wrong?
 - c. Are any young workers likely to use office equipment? Are any special precautions needed?
 - d. Are manufacturers' instructions followed?
 - e. The maintenance of office equipment.
 - f. The location of office equipment.
4. Purchase robust equipment suitable for the work and environment in which we require it to be used.
5. Develop a procedure based on these considerations.
6. Keep a written record of any significant risk assessments and the control measures and systems of work adopted.
7. Make sure that Managers and Supervisors understand the procedures and arrangements. Consider whether they need any training.
8. Explain our procedures and arrangements to our workforce. Ensure they are understood and provide training where necessary.
9. Implement the procedure and ensure that it is followed in practice.
10. Monitor and review the operation of this procedure from time to time and after any accident or incident, making changes identified as beneficial or necessary.

Information and advice on the use of fixed and portable office equipment can be found in our Guidance Note 4-4 – Office Equipment.

SLIPS, TRIPS AND FALLS

We have a duty to protect our workers and others visiting our premises from the risks of slipping, tripping and falling.

We meet this duty by:

- Nominating senior staff members to be responsible for monitoring and improving workplace pedestrian safety.
- Identifying all the potential causes of slips, trips and falls and assessing the risk.
- Developing and implementing procedures and control measures.
- Ensuring that pedestrian routes are fit for the purpose, that they are routinely maintained and checked.
- Ensuring that any risk assessments or safety inspections are carried out by competent and trained personnel.
- Adhering to our risk assessments, procedures and control measures.
- Providing wherever possible segregated traffic routes and adequate signage.
- Providing and recording relevant training.
- Regular monitoring and review of our arrangements to ensure that arrangements we have made remain sufficient to control the potential risk.

The personnel responsible for the above measures are identified within the Responsibility Table of our Health and Safety Policy.

SLIPS, TRIPS AND FALLS

Action Check List

To protect our workforce and others who visit our premises from the risk of accidents caused by slips, trips and falls we need to;

1. Identify where on our worksite there are potential areas for slips, trips or falls accidents.
2. Assess the hazards in each of those areas and the risks that people at work and others may face.
3. Identify existing controls and any additional measures that we should be taking.
4. Consider issues including;
 - a. Floor surfaces.
 - b. The environment.
 - c. Footwear.
 - d. Contamination.
 - e. Obstacles and obstructions.
 - f. Cleaning regimes.
 - g. People – human factors.
5. Involve workers in developing a procedure or arrangements based on these considerations.
6. Keep a written record of significant risk assessments and the control measures and systems of work adopted.
7. Make sure that Managers and Supervisors understand the procedures and arrangements. Consider whether they need any training.
8. Explain our system and arrangements to the workforce. Ensure they are understood and provide further training where necessary.
9. Implement the procedure and ensure that it is followed in practice.
10. Monitor and review the operation of this procedure from time to time and after any report of a dangerous incident or of a person suffering injury or due to slipping or tripping and falling on our premises or while at work making changes identified as necessary or beneficial.

Advice and guidance on slips, trips and falls can be found in Guidance Note 4-8.

WORK AT HEIGHT

We have a duty to ensure the health, safety and welfare of our employees and others against the risks involved in working at height.

We do this by:

- Nominating senior staff members to be responsible for identifying and managing work at height.
- Assessing the risks to our workers and others from the risks involved in working at height. Wherever possible we avoid the need to work at height by complying with the hierarchy of controls specified in legislation.
- Where we cannot avoid work at height we develop and implement procedures, control measures and Safe Systems of Work.
- Ensuring that access and other equipment provided for work at height is fit for the purpose, correctly installed, used and maintained, and checked at the correct frequency.
- Ensuring that risk assessments and inspections are carried out by competent and trained personnel.
- Ensuring that control measures are installed and managed by competent trained personnel.
- Following our risk assessments, procedures, control measures and Safe Systems of Work in practice.
- Providing and recording training.
- Monitoring and reviewing our systems; using our experience of operating these arrangements we aim to make improvements to the way we manage the risks from work at height.

The personnel responsible for the above measures are identified within the Responsibility Table of our Health and Safety Policy.

WORK AT HEIGHT

Action Check List

To ensure the safety of our employees and others whilst working in areas where they could be at risk because they are working at height we need to;

1. Assess our work activity to identify where and when workers or others may be exposed to hazard and risk due to work at height and wherever possible avoiding the need to work at height.
2. Where work at height cannot be avoided and a risk is identified complete a risk assessment for the task.
3. Involve the workforce in these assessments and in the identification of control measures to eliminate or reduce risk. Liaise with clients and others where necessary.
4. Identify the control measures already in place and any additional measures that may be required. Refer to manufacturers' guidance, trade guidance and British, European or Irish Standards etc.
5. Consider among other issues;
 - a. All work above ground where there is a risk of falling.
 - b. Occasional job tasks as well as routine tasks.
 - c. Does the work have to be done at height?
 - d. Use of appropriate access equipment.
 - e. Weather conditions.
 - f. Competency of workers.
 - g. Condition of ladders and access equipment.
 - h. Unexpected tasks e.g. leaking roof, overflowing gutter.
 - i. Safety nets.
 - j. Personal protective systems.
6. Develop procedures, programmes and practices tailored to our workplace.
7. Make sure that Managers and Supervisors understand the procedures and arrangements. Consider whether they need any training.
8. Explain these arrangements to the workforce. Ensure they are understood and provide training where necessary.
9. Implement the procedure and ensure that it is followed in practice.
10. Monitor and review the operation of this procedure from time to time and following any injury due to work at height, making changes to the procedure identified as necessary or beneficial.

Advice and guidance on health and safety during work at height can be found in Guidance Note 4-20.

MANUAL HANDLING

We have a duty to ensure the safety, health and welfare of our employees and others who enter our premises from the risks present in manual handling activities.

We do this by:

- Nominating senior staff members to manage and identify load or lifting hazards.
- Making an assessment of the risks from manual handling to our workforce.
- Developing and implementing procedures and systems of work to reduce the risks from manual handling operations in the course of our business.
- Ensuring that any Manual Handling Risk Assessments are undertaken by competent, trained personnel.
- Eliminating the need for manual handling through the introduction of mechanical handling equipment or other alternatives where this is reasonably practicable.
- Regularly inspecting the premises to identify any new processes, personnel or changes to the building's structure which would trigger the need for re-assessment.
- Employees and others adhering to the contents of procedures, control measures and Safe Systems of Work.
- Providing and recording job-based training for employees with manual handling tasks.
- Monitoring and reviewing our systems; using our experience of operating these arrangements we aim to make improvements to the way we manage the risks from manual handling.

The personnel responsible for the above measures are identified within the Responsibility Table of our Health and Safety Policy.

MANUAL HANDLING

Action Check List

To protect our workforce and others from the risk of injury while manual handling loads we need to;

1. Assess the risks to our workforce from handling loads. This includes lifting and carrying as well as pushing and pulling loaded containers.
2. Have a nominated Manager to lead the process.
3. Consider;
 - a. What we have to move - its size and shape.
 - b. The weight.
 - c. The frequency.
 - d. Which of our workforce is involved? Do some handle loads more frequently than others?
 - e. Can we reduce the need for movement? Are there mechanical aids we could use? Can we use them?
 - f. Can we adapt our processes to reduce the risk?
 - g. Have our workforce been trained in manual handling techniques for the products and goods that they handle in the course of their work?
 - h. Where team lifting is employed have the workers been trained in the same system?
 - i. Are the floors suitable and maintained for the work that goes on?
 - j. Are there extremes of temperature?
 - k. Are any groups or individual workers at particular risk?
 - l. Is health surveillance required? If yes at what level?
4. Keep a written record of significant risk assessments and the control measures and systems of work adopted.
5. Involve workers in developing a procedure based on these considerations.
6. Make sure that Managers and Supervisors understand the procedures and arrangements. Consider whether they need any training.
7. Explain these arrangements to our workforce. Ensure they are understood and provide further training where necessary.
8. Implement the procedure and ensure that it is followed in practice.
9. Monitor and review the operation of this procedure from time to time and after any ill health or back injury, making changes identified as necessary
10. Where employees are injured in an accident involving manual handling or are diagnosed with ill-health on account of manual handling at work report, to the enforcing authorities, those cases that fall into a reportable category. (Guidance Note 1-3 explains what is reportable).

Information and advice, including a template for Manual Handling Risk Assessments, can be found in our Guidance Note 5-9 – Manual Handling.

DISPLAY SCREEN EQUIPMENT

We have a duty to protect the safety, health and welfare of our workforce from the risk involved in the use of display screen equipment (DSE).

We do this by:

- Nominating senior staff members to identify and reduce risks from the use of display screen equipment.
- Assessing the risks from display screen equipment to each member of our workforce who uses them.
- Developing and implementing control measures, policies and Safe Systems of Work.
- Ensuring that the management of the policy, procedures, Safe Systems of Work and control measures relating to the use of display screen equipment are undertaken by competent, trained personnel.
- Providing and using personal protective equipment where appropriate.
- Managing our activities to ensure that employees and others use the control measures provided and follow our policies, procedures and Safe Systems of Work.
- Providing and recording relevant training.
- Monitoring and reviewing our systems; using our experience of operating these arrangements we aim to make improvements to the way we manage the risks from display screen equipment.

The personnel responsible for the DSE assessment process and these measures are identified in the Responsibility Table of our Health and Safety Policy.

DISPLAY SCREEN EQUIPMENT

Action Check List

To protect workers from the risks from display screen equipment we need to:

1. Appoint a member or members of staff and train them to become a competent assessor for display screen equipment.
2. Assess our work activity to identify where and when workers use display screen equipment.
3. Ensure all display screen users complete a Self-Assessment Questionnaire which can be found in Guidance Note 5-11.
4. Identify any workers with health issues that make them particularly susceptible to problems in using display screen equipment.
5. Identify the control measures already in place and any additional measures that may be required.
6. Consider the issues, including;
 - a. Furniture
 - b. Screen size
 - c. Lighting; reflections and glare
 - d. Rest breaks; rotating work activity
 - e. Eye sight tests
 - f. Home and off-site users of display screen equipment
 - g. Self-assessments and follow-up.
7. Keep a written record of all risk assessments, whether self-assessments or assessments by trained assessors and the control measures and systems of work adopted.
8. Make sure that Managers and Supervisors understand the procedures and arrangements. Consider whether they need any training.
9. Explain our system and arrangements to the workforce. Ensure they are understood and provide further training where necessary.
10. Implement the procedure and ensure that it is followed in practice.
11. Report any incidence of reportable ill health caused by the use of display screen equipment to the Enforcing Authorities.
12. Monitor and review the operation of this procedure from time to time and whenever an employee develops a display screen equipment related illness, make changes to the procedure identified as necessary or beneficial.

Advice and guidance on health, safety and welfare in the use of display screen equipment can be found in Guidance Note 5-11.

USE OF CHEMICAL AGENTS AND SUBSTANCES

We have a duty to ensure the safety, health and welfare of our employees and others who may be affected by our work activities from the harmful effects of exposure to hazardous substances in the course of our business.

We do this by:

- Nominating senior staff members to identify chemical agents or hazardous substances encountered in the course of our business and the hazards posed by them.
- Developing and implementing risk assessments, procedures or Safe Systems of Work and control measures.
- Ensuring that any risk assessments are undertaken by competent, trained personnel.
- Employees and others adhering to the contents of the developed procedures, control measures and Safe Systems of Work.
- Providing safe equipment for use with hazardous substances.
- Providing sufficient personal protective equipment.
- Providing and recording relevant training.
- Monitoring and reviewing our systems; using our experience of operating these arrangements we aim to make improvements to the way we manage the risks from chemical substances.

The personnel responsible for the above measures are identified within the Responsibility Table of our Health and Safety Policy.

USE OF CHEMICAL AGENTS AND SUBSTANCES

Action Check List

To protect our employees and others who may be affected by our work activities from the harmful effects of exposure to chemical and hazardous substances in the course of our business we need to;

1. Make an inventory of every hazardous substance used in the course of our business and those that could be generated as a by-product of our business processes.
2. Assess the hazardous substances we use and encounter and the risks that they pose to health and safety because of the quantities to which people are exposed or the way that we use them.
3. Assess or measure the levels of hazardous substances to which our workforce is exposed.
4. Identify the control measures that we should adopt.
5. Consider relevant matters including;
 - a. What hazardous substances do we use?
 - b. Are any hazardous substances created by the work we do?
 - c. Who might be exposed?
 - d. Where and when?
 - e. What are the levels they are exposed to?
 - f. How does this compare with the Workplace Exposure Limits?
 - g. Can we eliminate the risk entirely?
 - h. How do we reduce exposure?
 - i. What control measures are appropriate?
6. Record details of our assessments, measurements, results and any controls subsequently introduced.
7. Make sure that Managers and Supervisors understand the procedures and arrangements. Consider whether they need any training.
8. Inform, instruct and train workers about the hazardous substances we use, the risks, exposure levels in the workplace and any control measures introduced.
9. Implement the procedure and ensure that it is followed in practice.
10. Report any incidence of a reportable disease to the Enforcing Authorities.
11. From time to time check that the control measures are still working and that exposure levels are being controlled below the Workplace Exposure Limit.
12. Monitor and review the operation of this procedure from time to time and whenever hazardous substances give rise to incident, injury or ill-health, making changes to the procedure identified as necessary or beneficial.

Advice and guidance on controlling exposure to chemical substances can be found in Guidance Note 5-14.

ASBESTOS AT WORK

Duty to Identify, Control and Manage

Although our premises were built before 2000 we have not had an Asbestos Survey carried out to confirm the absence or identify the presence of asbestos containing materials (ACMs) in the building structure. We operate on the basis that whenever building and maintenance work that involves the building structure is carried out the work area is specifically and formally assessed for the presence of ACMs.

In the course of our business our workforce is unlikely to come into contact with any asbestos or asbestos containing materials at our customers' premises. We have therefore made no specific arrangements to manage exposure to asbestos and ACMs at other worksites.

We need to control this potential hazard and we do this by;

- Developing an Asbestos Management Plan which sets out our assessment procedure whenever building or maintenance work is planned.
- Making sure that our workers are trained and informed about the potential hazard and risks and know how to respond if they discover suspect ACMs.
- Nominating senior staff members to manage this process and to develop and implement procedures, Safe Systems of Work and control measures.
- Employees and others adhering to the contents of procedures, control measures and Safe Systems of Work.
- Employing competent trained contractors to aid in the assessments and subsequent activities where the presence of asbestos is identified.. Monitoring and reviewing our systems; using our experience of operating these arrangements we aim to make improvements to the way we manage the risks from asbestos.

The personnel responsible for the asbestos register and all of the above measures are identified within the Responsibility Table of our Health and Safety Policy.

ASBESTOS AT WORK

Duty to Identify, Control and Manage

Action Check List

To protect our workforce from the risk of exposure to asbestos from asbestos containing materials whilst at work we need to;

1. Make sure that all of our workforce is trained in asbestos awareness and the hazards and risks associated with exposure to ACMs.
2. Develop an Asbestos Management Plan which sets out the procedures for assessing the presence of ACMs whenever work that will disturb the building fabric is planned. We need to be able to take the advice of someone who is competent – able to advise on or analyse for the presence of asbestos and advise on how to deal with it.
3. The Plan needs to consider how to quickly deal with the material in accordance with the legal requirements where the work needs to be done in a short timescale.
4. Explain these arrangements to our workforce.
5. Make any contractors coming onto our premises aware of our policy and that there has not be an asbestos survey. They must treat all suspect material as containing asbestos until it is proved otherwise.
6. Explain our arrangements to supervisors and workers. Ensure they are understood.
7. Provide training where required and information for staff nominated with responsibility.
8. Implement the procedure and ensure that it is followed in practice.
9. Review the operation of this procedure at least annually.

Information and advice on the control and management of asbestos in buildings can be found in Guidance Note - 5-16.

CONTRACTOR CONTROL AND MANAGEMENT

To enhance the safety of our workforce and others, we implement effective methods to reduce the risks presented by the use of contractors and subcontractors.

We ascertain the competence of contractors and subcontractors and ensure our employees and others are adequately protected from the risks posed by situations where these groups are engaged and put systems into place to achieve this.

We do this by:

- Nominating senior staff members to coordinate and plan the selection of suitable, competent contractors or subcontractors.
- Requesting and reviewing the suitability and adequacy of the health and safety documentation submitted by the contractor or subcontractor.
- Checking the competence of contractors and subcontractors.
- Requesting a 'method statement' for the work.
- Ensuring that contractors and subcontractors adhere to their method statement and safety documentation.
- Ensuring that the contractors or subcontractors are aware of the procedures and risk assessments for any of our work processes that may affect them.
- Ensuring that contractors and subcontractors comply with our site specific company rules (**Safety Records**).
- Ensuring that any equipment used is inspected and tested at frequencies defined within current legislation and evidence of this can be supplied (**Safety Records**).
- Reviewing our own and contractors' systems.

The personnel responsible for the overseeing of contractors and subcontractors and the measures above are identified within the Responsibility Table of our Health and Safety Policy.

CONTRACTOR CONTROL AND MANAGEMENT

Action Check List

To ensure the safety of our employees and others when we have contractors working on our premises we need to be sure of their ability to control of health and safety from their work. We need to;

1. Assess the hazards and risks to our workforce that may be created by contractors working on our premises.
2. Assess the hazards and risks to the contractors from their presence on our premises.
3. Involve the workforce and the contractors in these assessments and in the identification of appropriate control measures.
4. Identify the control measures already in place and any additional measures that may be required. Refer to manufacturers' guidance, trade guidance, published Standards, etc.
5. Consider among other issues;
 - a. What will the contractor be doing? Where will they be doing it and when?
 - b. Does this put any of our staff at risk? Will our processes put the contractor or their staff at risk?
 - c. Should the contractor work only when our workforce is not present?
 - d. What knowledge do we have of the contractor's ability to manage health and safety?
 - e. Do we need to ask them to complete a pre-contract questionnaire or a method statement for the work?
 - f. Will they provide their own equipment - do they expect to use any of ours?
 - g. Will any plant they bring on site present risk to our workforce?
 - h. Does the place where the contractors will be working need to be fenced off to protect them from our work activities or vice versa?
 - i. Are their workers trained and competent?
 - j. Will the contractor's workers understand our rules, instructions and signs?
 - k. How well the contractor manages staff working on our site.
6. Develop procedures, programmes and practices for the times when contractors are working on our premises.
7. Make sure that Managers and Supervisors understand the procedures and arrangements. Consider whether they need any training.
8. Explain these arrangements to the workforce. Ensure they are understood and provide further training where necessary.
9. Implement the procedure and ensure that it is followed in practice.
10. Monitor and review the operation of this procedure from time to time and following any incident, injury or case of ill health, making changes to the procedure identified as necessary or beneficial.

Advice and guidance on health and safety during contract work can be found in Guidance Note 7-2.
